## PROFILE

Software Engineering student with hands-on experience developing backend APIs and full-stack applications using Node.js, NestJS, Express, and PostgreSQL. Experienced in designing RESTful APIs, implementing role-based access control, and maintaining data consistency. Eager to deepen backend engineering expertise and contribute to production systems.

## TECHNICAL SKILLS

| | |
|---|---|
| **Languages** | TypeScript, JavaScript ES6+ |
| **Frontend** | Next.js, React, Redux, Tailwind CSS |
| **Backend** | NestJS, Express, WebSocket |
| **Data** | PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch |
| **Production** | Docker, CI/CD, GitHub Actions, Jenkins, AWS Lightsail |
| **AI & Tools** | OpenAI, Codex, Claude, Git, Figma, Google Stitch, Cursor |

## EDUCATION

**FPT University** 2023 - Present

GPA: 8.1/10

## EXPERIENCE

**Software Engineer Intern** | FPT Software Jan 2026 - May 2026

Oil Gas Management System

Internal enterprise platform for drilling-rig oversight, equipment fault tracking and oil-production monitoring.

- Contributed to Express/Prisma incident APIs covering 5 fault categories and 3 severity levels, with MongoDB filtering and pagination for fault monitoring.
- Integrated React monitoring screens with rig, equipment and production APIs using Axios/TanStack Query.
- Integrated a Gemini/LangChain chatbot with 12 tools for operational data queries and management actions.

## SELECTED PROJECTS

**DineFlow** In development

Full-stack restaurant platform for QR ordering, kitchen operations and billing.

- Built QR ordering-to-billing flows with Next.js/NestJS, covering 6 order states for guests, kitchen and cashiers.
- Kept guest, staff and kitchen order views consistent with Socket.IO and TanStack Query refetching after connection drops.
- Guarded duplicate payments with PostgreSQL transactions, row locks and idempotency keys; a concurrency test asserts 2 identical requests yield 1 payment.
- Enforced 5 staff roles with NestJS RBAC; isolated tenants via Prisma scoping and composite foreign keys.
- Covered billing races and tenant isolation with integration tests, and checkout flows with Playwright.
- Documented the multi-tenant design and secured team buy-in for NestJS RBAC to strengthen data isolation and access control.

Next.js | NestJS | PostgreSQL | Prisma | Socket.IO | TanStack Query | Docker | MinIO
